Hungary and Bosnia & Herzegovina -Business opportunities

Date: 5/23/2016

1. Short description of technology/business collaboration opportunity:

DrySec™: The worlds first wipe dispenser and waste collector unit specifically designed for urinals

2. Detailed description:

DrySec™-s high-class design, ergonomic structure was specially developed for luxury/high-end establishments to satisfy the existing global personal hygienic need of men to wipe themselves after using the urinals. Therefore DrySec™ not only presents an additional value in prestige and service, but saves a great quantity of water for the operator, which means lower costs and an environmentally friendly approach. You can't find such a product on the market, it is patent, design and trade-mark protected – even in India.

Our company aims to open up volume sales internationally, therefore we are looking for:

1. retailers and distributors; who are innovative enough to expand their product portfolio with a great novelty and have the matching clientele.
2. regional representatives; who would supply a whole region, possibly set up manufacturing process in a consensual franchise type model.

More information and details can be found on our website: www.dry-sec.com

Website:	www.dry-sec.com
Established in year:	2009
Appx turnover in USD:	DrySec™ is a start-up project
Which countries are you present in:	Hungary

6. Additional comments:

DrySec™ is easy to install and use.

Thanks to its slim design, DrySec™ fits into almost every washroom, even ones with separation walls.

The paint and varnish finish is acid and alkali proof, which means urine won't corrodate the dispenser and all household cleaning agents can be used for cleaning.

DrySec™ comes in 4 basic colors (Ceramic White, Pearl White, Metallic and Black Anthracite), but custom colors can be negotiated from a variety of 40 000 shades.

Although DrySec™ is a totally new product, it has been tested in hotels, restaurants, baths, the Opera and theatres, and has produced great results and has been a success among guests. The product is also well recieved at professional trade shows and forums.
